SUMMARY

Motivated and detail-oriented Computer Science graduate with hands-on experience building full-stack web applications. Passionate about creating scalable, user-friendly solutions using the MERN stack — from designing REST APIs and MongoDB databases to crafting responsive React interfaces and deploying to production. Continuously learning and driven to contribute to impactful projects.

Work Experience

- ❖ **Full Stack Developer** April/2026 – Present
BerryBoost, Lahore (Job)
 - Developing full-stack web applications using MERN stack and TypeScript.
 - Building responsive frontend interfaces with React.js.
 - Designing REST APIs using Node.js and Express.js.
 - Collaborating with team members to deliver secure web solutions.
 - Writing clean, maintainable code with best practices.
 - Using GitHub and Postman for version control and API testing.
- ❖ **Full Stack Developer** Dec/2025 – March/2026
Thrive Grit, Lahore
 - Delivered 3 full-stack MERN applications from requirement gathering through to production deployment.
 - Built responsive, dynamic frontends using React.js and scalable REST APIs with Node.js and Express.js.
 - Managed MongoDB databases and collaborated with the team to ensure clean code, testing, and timely feature releases.

- ❖ **ExpenseTracker — MERN Stack** JWT Auth | REST API | Deployed
Project Based, Lahore [Link](#)
 - Built a full-stack expense splitting app using MERN Stack with JWT auth and Google OAuth.
 - Implemented group management, expense splitting, balance tracking, and payment settlement flow.
 - Developed an Admin Panel with role-based access to manage all users, groups, and expenses.

Education (2021-2025)

- University of Central Punjab (UCP), Lahore (BSCS)
- CGPA 3.63/4.0

Technical Skills

Frontend: React.js, HTML5, CSS3, JavaScript

Backend: Node.js, Express.js

Databases: MongoDB, MySQL

Automation & AI: n8n, Python Selenium, AI Workflow Design

Programming Languages: C++, Python, C#

Tools & Platforms: Git, GitHub, VS Code

Office & Productivity: Microsoft Office Suite (Word, Excel, PowerPoint)

- **MERN Stack Developer** Sep/2025 – Nov/2025
Aspire Analytics, Lahore (Internship)
- Working on full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Building dynamic, responsive frontend interfaces using React.js.
- Collaborating with cross-functional teams to design, develop, test, and deploy features.

Projects

❖ MERN Payment Application — MERN Stack

- Full-stack payment app with secure signup/login authentication built using MongoDB, Express.js, React.js, and Node.js.

❖ N8N Automation & AI Workflows

- Built intelligent automation workflows using n8n including a Telegram inventory bot with Supabase, AI image/video generation, CRUD operations, email notifications, and third-party API integrations.

❖ CareerQuest FYP— MERN [Link](#)

- Career counseling platform recommending jobs based on user profiles and skill assessments with personality module, responsive UI, and team collaboration using GitHub.

❖ Automation Testing — Python Selenium

- Automated UI testing for Consult My Doctors (CMD) covering login, signup, pharmacy, and medicine ordering flows with assertions and issue detection.
